## **Conflict-Free Statement**

We, A.L.M.T. Corp., conduct the "procurement activities grounded in compliance". And we've been recognizing it as one of the public concerns that the conflict minerals issue of Congo and its neighboring countries are critical in the supply chain. In order to fulfill social responsibility in procurement activities, we strive never to use conflict minerals (conflict-free). If it is necessary for that, we will investigate the use of conflict minerals to our supply chain. We will make efforts never to use it, when it causes social problem, or concerns that it is a source of funds for armed group.
